

Swedavia – Cargo Incentive

The Cargo Incentive programme consists of two parts, a New Destination Discount and a Progressive Discount Scheme, which cannot be combined. The Cargo Incentive is available for scheduled all-freighter aircrafts with MTOW above 200 tonnes.

New Destination Discount – Cargo

A destination is qualified for NDD if it has had less than 45 non-stop departures, excluding charter services, from a Swedavia airport within twelve months prior to the date of the start of the new service.

NDD is offered per Swedavia airport to all airlines that start a new route with a minimum of 45 departures and operate these within a period of a year (365 days).

The level of discount and the time period is specified in the table below.

Departing Airport	Charge	Year 1	Year 2	Year 3
Swedavia	Take off	40%	40%	40%

The Progressive Discount Scheme

For airlines operating more than 2 departures per week, the progressive discount scheme is available. The level of discount is specified in the table below.

Departing Airport	Charge	3 departures per week	4 departures per week	5+ departures per week
Swedavia	Take off	10%	20%	30%
